### DESIGNER CERTIFICATION (Grading)

I hereby certify that the attached plans, engineering calculations, diagrams, and other data submitted were prepared by me or under my supervision, and that the above documents are of sufficient clarity to indicate the location, nature, and extent of the work proposed and show in detail that all work will conform to all relevant laws, ordinances, rules and regulations, including, but not limited to, the following:

**Tehachapi City Building Code, California Building Codes, Kern County Code of Building Regulations Tehachapi City Development Standards, California Water Code- NPDES Permit Activity and Code of Federal Regulations**

With respect to the storm water and NPDES requirements per the above referenced Codes, Regulations and Standards, etc., please answer the following questions:

- 1] **Will construction activity result in the disturbance of one acre or more of total land area?**  
YES                      NO
  
- 2] **Is construction activity 'oil & gas' related and will it result in the discharge of storm water to a Water of the United States containing contaminants and/or sediments?**  
YES                      NO
  
- 3] **Is construction activity < 1 acre? If "Yes", please provide Site Development Plan in compliance with California Green Building Standards Code (CALGreen) requirements (§4.106 or §5.106, whichever applies).**  
YES                      NO

I understand that if the answer to questions 1 or 2 is "yes", then I must complete and attach the "Applicability of NPDES Storm Water Program" form.

I understand that any work within the road right-of-way requires an encroachment permit from the City of Tehachapi.

In regards to drainage, all facilities have been designed and sized in accordance with the City of Tehachapi Development Standards. Additionally, the drainage basin soil testing to determine infiltration rates and slope stability analysis as required by those standards have been performed and meet the requirement that the drainage basin will completely drain within seven days and that the side slopes, as designed, are stable.
